Subject	**Test Method**	**Contents**

Real-Time Hybrid Test Method

Numerical Analysis

Substructuring Technique

Performance Evaluation of
Tuned Liquid Damper

Performance Evaluation of
Tuned Liquid Column Damper

Performance Evaluation of
Tuned Liquid Mass Damper

Shaking Table Test

Design of Excitation System
for Simulating Dynamic Loads

Simulating Wind-Response

Simulating Seismic Response

Actuator

Real-Scale Five-Stroy Building

RT-HYTEM Test for Non-linear Device
with Real-scaled Building Structure

Pseudo Earthquake Experiment
of MR Damper for Real-scaled Building

RT-HYTEM of Real Scaled MR Damper with
Semi Active Control Algorithms

Compensation of Dynamic Characteristics

Controller Design of Shaking Table

Controller Design of HMD

Controller Design of UTM

Integrated Controller of
Substrcuture and Actuator

System Identification

Parametric System Identification in Time-domain

Finite Element Model Update

Design Filter & Envelop Function

Inverse Transfer Function Method

Semi-active Control Algorithms

Simple Bouc-Wen Model
Parametric Identification

Semi-active Control Algorithms
